

**PRECISION.  
EVOLUTION.**

**We wish to  
pursue our  
tradition and  
evolve amongst  
our partners,  
with passion  
and precision!**

# Alessandro Gallizioli

THE TEAM

With an overall professional experience of over 25 years, both in the family and in other Swiss, French and German companies, Alessandro Gallizioli decided to start the present firm in the year 2015, in order to develop a new chapter in the family business, based on his professional expertise in various fields of work.

SERVICES

# WHAT WE DO

**CNC Milling and turning of ferrous and non-ferrous products, as well as horizontal surface grinding and 3D measuring.**

SERVICE TYPES

---

## MILLING

CNC machine processing of ferrous and non-ferrous products.

---

## TURNING

CNC machine and Semi Automatic processing of ferrous and non-ferrous products.

---

## HORIZONTAL SURFACE GRINDING

Mechanical and manual processing of ferrous and non-ferrous products.

---

## 3D MEASURING

Measuring components with the help of 3D DEA GLOBAL.

# WHAT WE CAN DO FOR YOU

Personalized services for small and medium production lines. Based on the component that needs to be processed, our production capacity is between 50 - 10.000 pieces.

**For personalized offers, please contact the Sales Department.**

## CNC TURNING MACHINE PROCESSING

The CNC assembly for ferrous and non-ferrous product processing includes two individual turning centers, that can process elements starting at the minimum size of  $\text{Ø}20$  mm x 20 mm, up to products measuring  $\text{Ø}400$  mm x 800 mm.

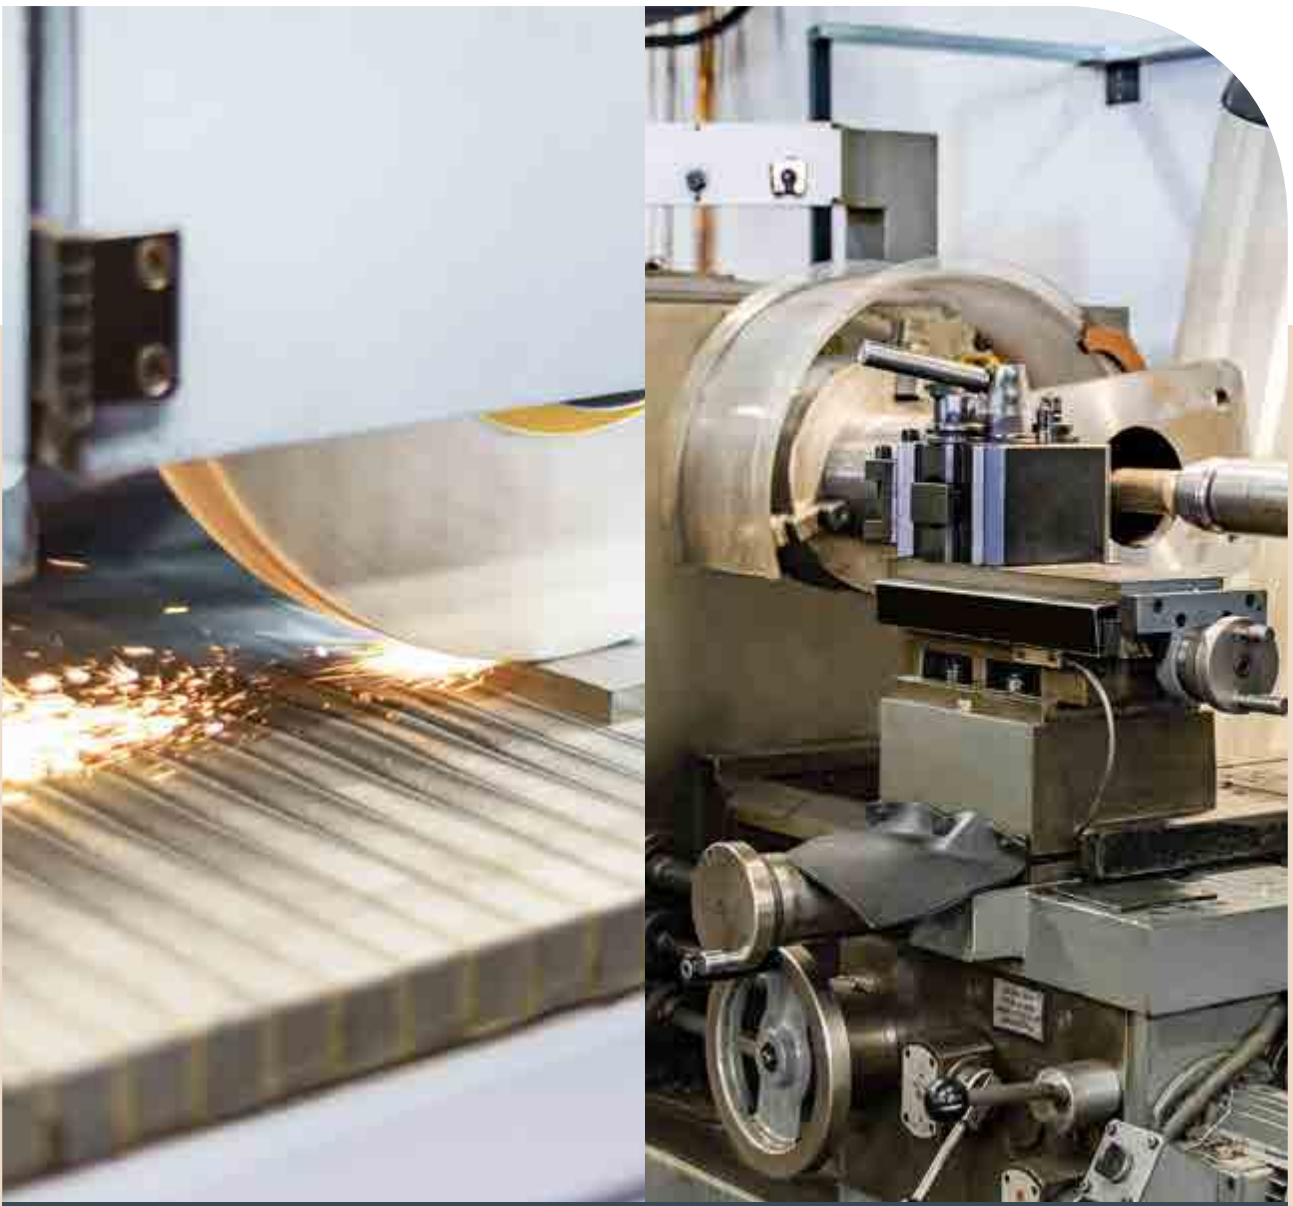

## CNC MILLING MACHINE PROCESSING

The CNC assembly for ferrous and non-ferrous product processing includes three individual milling centers, that can process elements starting at the minimum size of  $\varnothing 20$  mm x 20 mm x 20 mm, up to products measuring  $\varnothing 800$  mm x 800 mm x 800 mm.

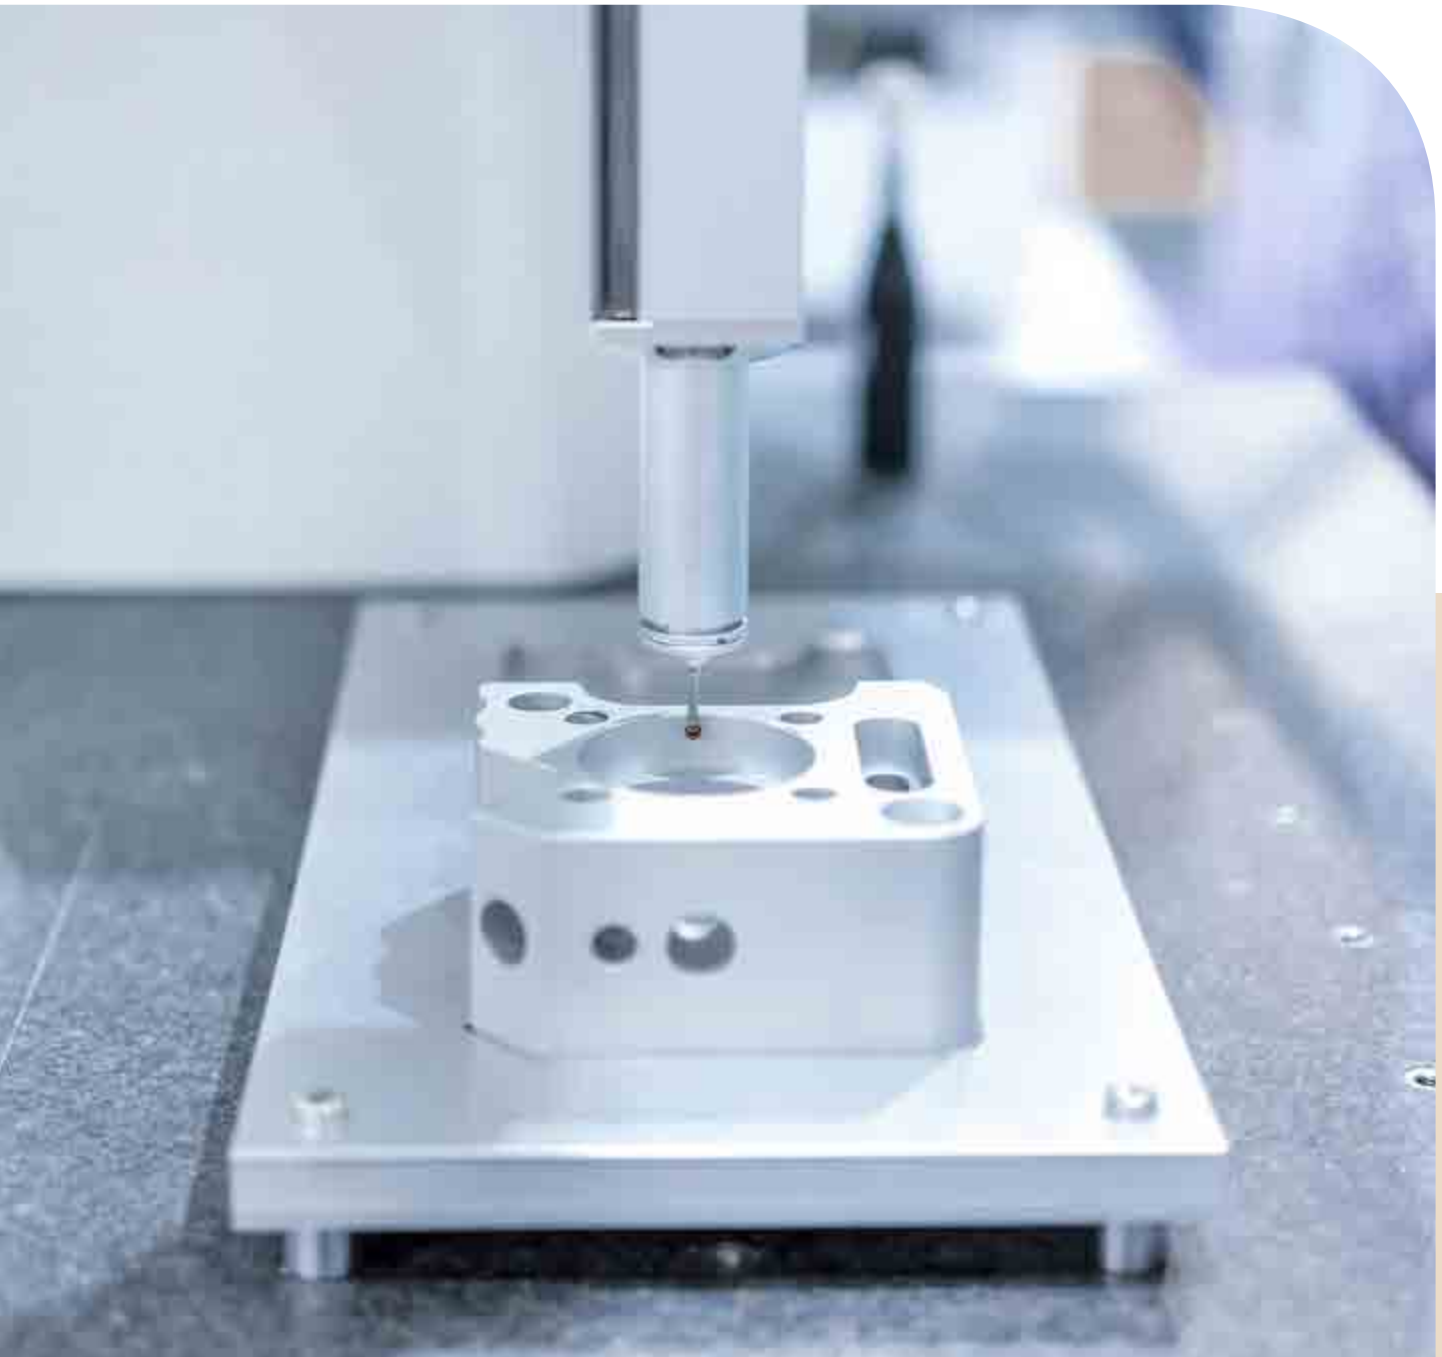

## HORIZONTAL SURFACE GRINDING AND MANUAL TURNING

Horizontal surface grinding and manual turning,  
for reconditioning unique parts and components.

## 3D MEASURING & ASSEMBLING

The precise 3D measuring is done with the help of the DEA GLOBAL equipment, that can determine component sizes with a precision up to  $5\mu$ .

# PRODUCTS

---

## INDUSTRIAL VEHICLES SECTOR

Milled parts and components for industrial vehicles

---

## AGRICULTURAL MACHINES SECTOR

Milled parts and components for agricultural machines

---

## SHIPBUILDING SECTOR

Milled parts and components for ships

---

## AERONAUTICS SECTOR

Milled and turned parts and components for aeronautics

---

## VACUM VALVE MANUFACTURING SECTOR

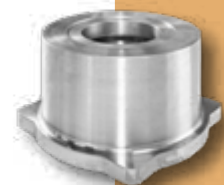

Turned parts and components for the manufacturing of vacuum valves

---

## VARIOUS INDUSTRIAL SECTORS

Exchange parts and components for various industrial sectors

---
